CONTACT US sales@thecarkeystore.com

IMPORTANT NOTES:

Prices are for our store brand keys or refurbished keys. If you would like a new key for a specific job, please call for pricing.

Specific logo keys, for example SRT logo or Mustang logo keys, may be substituted for Dodge logo or Ford logo keys. If you would like a specific logo key, we are happy to order it in. Pricing may vary depending on availability.

Chrysler FOB/K keys are considered "remote-head keys" for pricing purposes. FOB/K Keyless-Go key pricing falls under the "Smart Key" category. For all FOB/K key applications, a POD key can be substituted as a cost saving alternative when the complete FOB/K key isn't required.

GM VATS keys are considered to be transponder keys for pricing purposes.

The price to duplicate standard edge cut, non-transponder keys is \$10. The price to duplicate transponder keys is \$59.

2014-2018 NISSAN ROGUE WARNING!!!

There is a flaw built into the 2014-2018 Nissan Rogue. It only affects the 2014-2018 Rogue with SMART KEYS. The key ignition models are not affected. Sometimes when programming a new key, the body control module in the vehicle will not accept any new keys. Furthermore, the old keys will no longer work. This leaves the vehicle inoperable, and the only solution is to replace the BCM along with new keys. The job costs roughly \$1,500.00. The Car Key Store accepts no responsibility if the BCM becomes corrupted when programming new keys to these vehicles.

A Service Call Charge of \$99 will apply to all wholesale transactions when a specific appointment is required. This includes meeting up (in our local area) with customers at their home or work for service.

There is a minimum charge of \$149 to come out of our shop for any service. All retail calls that are done outside of our shop will incur a \$149 service call charge.

Some keys (such as 2017+ Subaru Remote-Head Keys) are currently VERY hard to find used or refurbished. If we cannot source refurbished keys for certain vehicles, we can always get new keys, but pricing will increase.
